

90-degree elbow cable tray

Overview

The 90° Vertical Elbow provides essential support and enables seamless cable management throughout your cable routing system. Class 1: Designed for use with NEMA Classes 12B and 12C cable trays. Standard 12", 24" and 36" radius are available for all fittings. Creating a 90-degree elbow in an electrical cable tray, often called a "fabricated" or "mitered" bend, involves cutting, bending, and fastening a straight section of tray. The most common method involves creating two 45-degree cuts to form a 90-degree angle. With its pre-galvanized steel base and interlocking polymer sidewalls, the PreF. Need technical support or a quote?

We're here. Diagonal Corner R=75 mm (Standard) 2. Used to change the direction of the cable tray by 90 degrees, this cable tray offers exceptional flexibility and adaptability to various shapes.
