

All power to the intelligent distribution box is cut off

Overview

Look for blown fuses that may cut off power flow and replace those as needed. Have a qualified auto electrician to perform a detailed diagnostics on all IPDM-controlled systems. Ensure the wiring harness to the IPDM is intact, with no damaged wires or connectors. Our intelligent and mechanical boxes in the area of power and data distribution offer modular solutions for all voltage levels and at the same time optimize functionality - for maximum efficiency with maximum safety. Long cable runs can result in a voltage drop, which can be solved by using a heavy gauge wire. Check wires/DIN terminal clasps to. Digital technologies such as Cloud Computing, Big Data, Internet of Things (IoT), Artificial Intelligence (AI) and Industry 4. These problems may come and go unpredictably. Background Traditional distribution boxes are difficult to implement remote monitoring due to.
