

Australia Aggregation Switch

Overview

Equipped with all-fiber ports, Aggregation Series Switches deliver up to 25 Gbps. With features such as Static Routing, DHCP Server, ACL, IGMP Snooping, STP, LAG, and centralized cloud management, they offer a robust and reliable solution for the aggregation layer of SMB. The Ubiquiti UniFi Aggregation Series delivers high-performance fibre aggregation switching for modern enterprise, campus, and data centre environments across Australia and New Zealand. Fast Australia-wide delivery | Scorptec Computers

An aggregation switch is a network device that consolidates traffic from multiple access switches, wireless access points, or other edge devices and forwards it to core switches or routers. This advanced Layer 2 switch features 8 high-speed 10G SFP+ ports, ensuring seamless data transfer and optimal performance for your network infrastructure. Ideal for demanding environments, it enables quick deployment and reliable connectivity.
