

Cable tray vertically tilted down

Overview

This model is a vertical 90 degree down-turn bend transition tray. Connects to any ASP cable tray with splice clamps provided. Standard depth is 4" with optional depth of 6". As you can see from the image illustrated below □□ I have a set of cable tray run in my model which I need to change their rotation by 180 degrees. Need more information?

There are cable rack systems intended for vertical stacking of horizontal cable runs. Think of it as the "spinal cord" or the " elevator shaft " for your cabling infrastructure, providing a protected and structured pathway for cables to travel. Users can achieve design flexibility with numerous sizes of horizontal and vertical elbows, adjustable elbows, cross pieces, tees, reducers, and branches. All types and widths of tray are. maintain spacing or to keep cables in place when the tray is ect the minimum bend radius for cables as they exit the bottom of the cable tray.
