

Columbia Fiber Ethernet Switch QSFP28

Overview

The S5850-48B8C-PE is a layer 3 switch with wire-speed 48x 10G/25G SFP28 and 8x 40G/100G QSFP28 (breakout to 4x 10G/25G) ports, delivering 4 Tbps switching capacity and 2976 Mpps forwarding rate. It features redundant hot-swappable power supplies, smart fans, and dual-flash chips for enhanced. Like an SFP port, a QSFP port is a physical cage and connector in a high-speed networking device that accepts only a QSFP form factor module insert. We sometimes refer to it as a QSFP+ port; however, you should know they have the same meaning. Typically, a QSFP port is the same height as an SFP but. At the heart of these deployments is the QSFP28, a compact, high-density transceiver. It is the essential component that enables flexible, scalable connectivity across switches, routers, and servers. More importantly, it provides the bridge for the 100G upgrade path, allowing interoperability with. Have any questions?
