

Communication optical cable dp

Overview

DisplayPort Fiber Optic Cables are high-performance cables that transmit audio and video signals over long distances without any signal loss or degradation. 4 cable is a pure fiber DisplayPort 1. Therefore, the cable makes use of an auxiliary integrated circuit (chipset). Specifically, in each of the two connectors of which the cable is made up there is a chipset, which is where both the fibre optic conductors that. KanexPro Active Optical DisplayPort 2. 0 Cables deliver full, uncompressed 40Gbps UHBR10 signal across runs of 30, 60, or 90 meters — far beyond copper cable limits. Built on a hybrid 4x optical fiber + 8x copper construction, these plug-and-play cables carry 8K@60Hz, 4K@144Hz, and HDR with zero. Shattering Limitations — DVIgear's HyperLight ® Series is a new generation of advanced Active Optical Cables (AOC) that employs cutting edge technology to deliver unprecedented resolution, performance and value.
