

# Connecting a switch to an optical router

## Overview

Connect the router to the switch: Take an Ethernet cable & plug one end into an available LAN port on the router. Make sure to use a standard Ethernet cable and not the uplink port on the switch, if I've been reading about various switches and the functions they can support, and read about 'port aggregation' - if I understand this concept correctly, it means that I can effectively tell the switch something along the lines of, "See these 3 ports here - they all go to the same device (my. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. In this guide, we'll walk you through how to connect a fiber optic cable to a router safely and efficiently. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly. As we speak I just have optic fibre (Community Fibre) connected to my Huawei modem / Linksys Velop which will be connected to a new POE switch (need to identify the best model to be compatible with my optic fibre extension project). The objective is to run 1 or 2 additional optic fibre from the. With a fiber ONT can I go straight into a switch?

I have multi gig internet coming into my house via a fiber ONT. 5gbps port and (2) gigabit ports. Whether you are setting up a small home network or a large-scale enterprise network, understanding how to connect these essential networking devices is crucial.
