

Core switch configuration lost

Overview

This professional guide provides actionable, step-by-step instructions for backing up and restoring Cisco switch configurations (covering popular platforms like Cisco IOS, IOS XE, and NX-OS) to ensure global enterprise network resilience and business continuity. sounds like someone has set the flag to ignore the startup-config when the switch boots. HTH! For network engineers, IT administrators, and system integrators, losing days—or even months—of complex configuration work can happen in a matter of seconds. This may occur due to configuration errors, software corruption, or sudden hardware failure. This professional guide provides actionable. Did all the switches lose their configs at or near the same time?

Could someone have done an “express setup” on those devices, either by pressing the reset buttons, or a boot accidentally pressing the button?

I found this old thread: Why SW-3850 loses config after reload even though config is. We have a pair of Dell N3224P-ON switches and today's morning my colleague gave me a task and instructions to remove some unused VLANs. I'm sure I removed the correct VLANs. Before getting into the how-to, it's essential to understand why. How to solve the problem of corrupted switch configuration after power outage?

When a power outage occurs, a switch's configuration can become corrupted, leading to network disruptions.
