

Cuba Access Switch 100G

Overview

The RG-S6580-48CQ8QC is a high-density access switch and provides various ports within the space of 1 RU. With improved data forwarding capabilities, it can be flexibly deployed and supports access of 100G servers. It can evolve to 100GE/400GE data centers. Automation Industry, Branch Office, Enterprise, Infrastructure, Network, Personal, Power, Router, Security, Server, Small Business, Surveillance, Traffic Automation Industry, Branch Office, Enterprise, Infrastructure, Network, Personal, Power, Router, Security, Serv. See more Security, Ease of Use. Your most affordable, compact, energy-efficient doorway to the world of 100 Gigabit networking. This switch is the next step in upgrading existing 10 or 25 Gigabit networks. The fiber optic ports are designed as SFP slots, therefore you can connect to any fiber type or different wavelengths by choosing a suitable SFP module. The 100G Ethernet Switch is a high-performance network device engineered to provide throughput of up to 100 gigabits per second (Gbps). As discussed in our previous post “When to Upgrade to 100G”, the relentless growth of data traffic, fueled by cloud computing, video streaming, real-time.
