

Distribution Box Adaptive

Overview

These boxes act as traffic controllers for electricity, dynamically routing power where it's needed most. It's like replacing old water pipes with smart valves that adjust flow based on real-time demand – preventing floods and droughts in your digital landscape. ABB Electrification Digital Systems deliver pre-configured and completely engineered grid automation indoor and outdoor cabinets, comprising of constituent products such as Relion REC615 advanced protection and control, hardwired IO unit RIO600, Arctic ARx600 wireless gateways, third party RTUs. Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. The range of applications extends from pure energy distribution in buildings to building automation and through to industrial plants. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS. Adaptive topology reconfiguration and the Smart Power Distribution Unit from ESTEL give you the flexibility to manage these challenges.
