

Fiber Optic Cable Reservation Rack for Wells

Overview

The cable reserve frame is an element used for safe storage of the fiber optic cable in wells or telecommunications facilities. Provides an accumulation of up to 50 meters of cable. Streamline fiber optic cable management with the robust 60x60cm Cross-frame, a pole-mounted solution for maintaining main cable. CommScope offers a variety of easy-to-install frames, racks and cabinets specially engineered for network equipment and fiber cable management. The cabinets are produced in black anodised aluminum and the multi-purpose rack comprises a lightweight aluminium frame. The Foss System is affordable with low to zero maintenance costs. Fiber rack-mount enclosures use the HDX cassette platform to provide an ultra-high-density solution for. The Slack Cable Storage is used to store cable reserves on poles/walls and in chambers. An integrated box holder is included.

Reducing Intervention in Subsea Wells With Fiber-Optic

Fig. 1—For distributed-temperature applications, optical fibers were traditionally deployed into a well by pumping into a control line. Now that fibers

ExpressFiber™ disposable fiber service

The ExpressFiber disposable fiber cable is an economic, low-risk fiber solution for cross-well monitoring that provides direct measurement of well interference.

InstallGuide

Although most fiber optic cables are not conductive, any metallic hardware used in fiber optic cabling systems (such as wall-mounted termination boxes, racks, and patch panels) must be grounded.

FMC Telco B2B | Cable racks

Enhance your fiber optic cable installations with our comprehensive mounting set, featuring a sturdy 60 cm cable reserve frame and a 25 cm spacer, complete with a GPLATE adapter for seamless
