

Fiber Optic Coupler Components

Overview

Fiber couplers, inline photodiodes, WDMs, combiners, circulators, and optical switches provide fundamental building blocks for fiber-based optical circuits. Thorlabs offers a wide variety of collimation and coupling components that can be used to effectively collimate or couple light out of and into FC/PC, FC/APC, or SMA terminated fiber. Light from an input fiber can appear at one or more outputs. Here you'll find the full range of products available at LASER COMPONENTS. They are all tested prior to shipment, using the application specific, calibrated test equipment site wide. Fused Biconic Taper (FBT) and Planar. Fiber optic couplers are optical devices that connect three or more fiber ends, dividing one input between two or more outputs, or combining two or more inputs into one output. Our inventory features high-performance components from industry-leading brands such as Panduit, Phoenix Contact, L-com and our brand RS PRO.
