Overview

The neutral wire is represented by the letter "N" for "Neutralleiter" and the protective earth wire is denoted by the letter "PE" for "Protective Earth". See the overview of the color codes that Dieter Braun GmbH uses. If you have any further questions, please do not hesitate to contact us. Unlike BS 7671, the individual parts of HD 60364 are published separately. Whilst both BS 7671 and VDE 0100 are based on HD 60364 series, there are specific country-specific requirements. German electrical schematic symbols are standardized symbols that represent different electrical components and devices. These symbols are used to convey information about voltage, current, resistance, and other important electrical properties. By using a common set of symbols, electrical engineers. Electric wiring has become an integral part of modern technology and it is necessary to understand the electrical symbols used when wiring.
