

Global AI Server Shipments

Overview

According to new market research by TrendForce, worldwide AI server shipments are forecast to grow by more than 28% year over year, significantly outpacing the broader server market, which is expected to expand by 12. Market Size by Server, by Hardware, by Cooling Technology, by Deployment, by Application, by End Use. A comprehensive report by Global Market Insights Inc. The market is expected to grow from USD 167. North American cloud service providers' (CSPs) continued investments in AI infrastructure are expected to increase global AI server shipments by more than 28%. Global server shipments are expected to grow by only around 1. 9% in 2024, continuously being squeezed out by budgets for AI servers. 5% YoY growth in 2024, to meet the strong demand of CSPs and OEMs generative AI training and inference. □□ January 26, 2026 - Global shipments of AI servers are set to accelerate sharply in 2026, driven by rising inference workloads, renewed cloud investment cycles, and the growing adoption of custom silicon.
