

How to lay out a mobile power distribution box

Overview

This page contains the build plans that I designed in order to create a simple box to house a portable power station and run wires throughout your rig. A Sketchup file and tutorial video are both linked at the bottom of this page. In this case, I will attempt to use KiCad, Autodesk Fusion, Bambu Lab X1 Carbon, and Mouser Electronics to build a power distribution box for my 3 Viltrox DC-550 Pro field monitors. more. X number of relays - Relays with holders, based on how ever many toys you need to power. I put 4 holders but am only currently using 3. Minimum one fuse slot per relay being used. Load prioritization ensures critical devices receive power first. It serves as a central hub for distributing electricity throughout a building, ensuring that power is delivered safely and efficiently to all the required locations. Building your own distribution box allows.
