

Huawei Core Switch CE7850

Overview

The Huawei CE7850-EI-B00 is a high-performance, high-density data center switch designed for enterprise core, aggregation, and cloud networking environments. This document provides an overall description of the CE5800&6800&7800&8800 series switches hardware that versions earlier than V200R020C00, helping you obtain detailed information about each chassis, power module, fan module, card, cable, and pluggable modules for ports. When the altitude is 1800-5000 m (5096-16404 ft. Part of the Huawei CloudEngine CE7800 series, this switch provides 32 x 40GE QSFP+ ports for ultra-high-speed connectivity, combined with. CloudEngine 58&68&78&88&98 Series Switches: Access product manuals, HedEx documents, product images and visio stencils. Huawei's CloudEngine 7800 Series Data Center Switches offer 32 x 40 GE ports in a single 1U device that delivers exceptional throughput and low latency as a core or aggregation switch for data centers and high-end campus networks. A stack system with as many as 16 member switches provides up to 512. Advanced architecture supports virtualization and Layer 2 Transparent Interconnection of Lots of Links (TRILL), for provisioning, migrating, and managing security policies in networks with up to 512 nodes Each 40 GE port can be used as multiple 10 GE ports for flexible networking Cargo will be.

Article Content

CE7800 Series

Currently, CE7800 series switches include the CE7850 series and CE7855 series. Each switch provides 32 40GE QSFP+ optical interfaces, and each of these interfaces can be split into four 10GE interfaces.
