

Huawei MA5800 Optical Module

Overview

The MA5800 multi-service access device is a 4K/8K/VR-ready OLT in the gigabit ultra-broadband era. It supports the PON/10G PON/50G PON/GE/10GE shared platform. The MA5800 adopts the distributed architecture and supports multi-media gigabit aggregation, optimal 4K/8K/VR video experience. Huawei's SmartAX MA5800 multiple-service access module employs a distributed architecture to support ultra-broadband, Fixed Mobile Convergence (FMC) services, and smart capabilities, such as SDN-based virtualization. MA5800's programmable Network Processor (NP) chip set accelerates the roll-out of. Huawei MA5800 optical module reference, Issue 35. Covers everything from SFP and eSFP all the way up to QSFP28 and the newer Symmetrical 50G-PON combo modules. Full specs, Tx/Rx power levels, wavelengths, connector types, transmission distances, the whole thing. If you're working with GPON, XG-PON. The industry's first next-generation, 40 Gbit/s-capacity Optical Line Terminal (NG-OLT).

Article Content

MA5800 series 16-port H901GPHF C++ GPON OLT

The MA5800 can meet operator demands for a Gigaband network with wider coverage, faster broadband, and smarter connectivity. For operators, the MA5800

SmartAX MA5800 OLT MA5800-X2

Multi-service virtualization platform: Easy to maintain and space-saving. A physical OLT is virtualized into multiple OLTs; each virtual OLT can be independently configured and managed to isolate
