

Huawei ONU optical module model

Overview

OptiXstar MA5671A is a mini plug-and-play Passive Optical Network (PON) access device an Optical Network Unit (ONU) that supports one-stop deployment, even achievable offline when using Gigabit-capable Passive Optical Network (GPON) upstream transmission. The GPON ONU Stick transceiver module is designed with a simpler and more cost-optimised architecture that ultimately reduces the number of devices deployed and managed in a network. It integrates bidirectional data transmission over one single-mode optical fibre. Once deployed, OptiXstar MA5671A. Huawei OptiXstar S600E is a miniature GPON SFP ONU device that can be inserted into the SFP port of a camera or AP device to provide GPON access for the device to meet the requirements of video backhaul or wireless backhaul. Small Size and Light Weight • SFP shape type. It features eight GE ports that support Power over Ethernet (PoE) and Power over Ethernet Plus (PoE+), providing high-quality voice, data, and High Definition (HD) video services.
