

Huijue Fiber Optic Switch Port Reboot

Overview

If possible, remove and reinstall the optical modules to check whether the fault is rectified. This document describes how to check the switch interface or port status and how to locate an interface physically down fault and restore the interface to the up state. Hardware failures: include hardware. Ok, after hours of testing, I think this sums up the issues I'm having with fiber SFPs on my 9300L (both 24P-4G and 48P-4Gs). It does not seem to do this with GLC-T copper SFPs just all fiber SFPs (Cisco 1000BaseLX, 1000BaseSX either GLC-LH-SMD++= or GLC-LH-SM= or GLC-SX-MMD++=). I have seen this kind of issue on both '3750X series and 2960X series', and issue is following: - Swithes are 48- Ethernet ports PoE + 4 Fiber ports - 3750X switch = 3/4 ports are currently plugged with Cisco GBIC module. We currently have the problem that our customer has an HA configured with two XGS2100 and after a restart / failover test one of the fiber ports remains down and thus the entire network is paralyzed. As soon as I restart the firewall, the Auxiliary Sophos takes over cleanly. When the primary Sophos. Does a Port Frequently Alternate Between Up and Down States When a Non-Huawei-Certified Optical Module Is Used?
