

Installation height of the distribution box at the bottom

Overview

According to standards, the height from the bottom edge of a distribution box to the floor is generally 1. This height also safeguards the box from potential. According to the "Code for Acceptance of Construction Quality of Building Electrical Engineering" GB50303-2002, the vertical distance between the bottom surface of the fixed stainless steel enclosure ip67 and the ground should be greater than 1. The bottom surface. Ground-mounted foundations should be 50 to 100 mm above ground level. 4m away from the ground; when surface installed in the wall, the bottom is 1. However, this height can be adjusted higher or lower appropriately for operational and maintenance convenience, provided design. Choose the right box based on environment (indoor/outdoor), load capacity, and durability. Check for proper IP/NEMA ratings and material quality. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1. Practice good wiring: secure.
