

Metal pigtail channel

Overview

They are steel channels with outward flanges that are perpendicular to the usual steel channel flanges. This design makes them ideal for framing roofs. Besides that, they make a good addition as supports in ceilings or floors, ensuring the durability of these constructions. Please note that U-profiles with polished surface, can become undersized as a result of surface grinding. Grinded or polished stainless steel U channels you'll receive in so. Choose from our selection of C-channels, including low-carbon steel U-channels, architectural 6063 aluminum U-channels, and more. Metal channel is also known as a C channel or U channel due to its profile and is available in mild steel, stainless steel, brass, and aluminium. Steel Channel is widely used in industrial maintenance, agricultural implements, transportation equipment, truck. ClarkDietrich furring channel is a hat-shaped corrosion-resistant framing component used to furr out masonry walls and ceiling assemblies.
