

Modular Data Center in Nigeria

Overview

MTN Nigeria and Dell Technologies have launched the Dabengwa Data Centre, West Africa's largest modular data facility. The \$150 million facility, along with the introduction of MTN Cloud and the upcoming Cloud Accelerator Program, positions Nigeria as a regional digital hub. MainOne, an Equinix Company, is a prominent provider of data center solutions in West Africa, particularly through its MDXi subsidiary, which specializes in building and operating data centers. Centdoor Limited specializes in telecommunications and infrastructure solutions, offering comprehensive. Modular data centre solutions promote designs that adapt to complex infrastructure requirements in different locations and environments. This. As Nigeria's digital economy expands and artificial intelligence (AI) adoption accelerates, businesses across industries face increasing demands for efficient, scalable, and cost-effective data infrastructure. To address these growing needs, Schneider Electric, a global leader in energy management.
