

# New Data Center Room Construction

## Overview

Data center construction builds secure facilities for servers, power, and cooling systems. They're also a huge undertaking – data center construction requires proper planning, design, and. Data center standards encompass data privacy, as exemplified by the Federal Information Security Management Act (FISMA) in the United States and the General Data Protection Regulation (GDPR) in the European Union. Get costs, timelines, key steps, and tips to manage your project. Track equipment procurement. Multinational corporations such as Amazon Web Services (AWS), Microsoft Azure, Google Cloud, Meta Platforms, Equinix, and Digital Realty are constructing data centers worldwide. These top data center companies are adding nearly 50 million square feet and over 1 gigawatt of capacity globally. Growth in enterprise workloads and generative AI is accelerating investment, with major technology companies expected to deploy \$1. 8 trillion globally between 2024 and 2030 to meet demand. In the UK, recent analysis shows that the UK Data Centre market is expected to grow by 13% a year during the period 2025-2030, evolving rapidly driven due to robust digital infrastructure development and an ever-increasing adoption of cloud data centre services This guide explores the key aspects.
