

# Ordinary funnel for cable trays

## Overview

Outlet funnels for cable trays are formed parts for safe, organized, and material-friendly cable routing. This applies to the screw-on variants as well as the cable trays with the innovative Magic plug connection. They are easier and quicker to install. This allows cables to be cleanly routed out of the support system, bending radii to be. us-trations without notice. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. Stainless steel cable hoppers are professional equipment designed to ensure high efficiency and precision in the raw material feeding and directing processes prior to extrusion in cable production lines. At ÖNSA Makine, we manufacture optimised funnel systems that stabilise the flow of granules or. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. There are several types of cable trays, including ladder, perforated, solid bottom, basket, and channel trays.
