

PE wire and distribution box

Overview

The box is made of polyethylene material, which has many advantages in industry: good finishing, corrosion resistance, high compressive strength, waterproof, moisture-proof, non-slip, high dielectric performance, good electrical insulation, and long service life. Ozplast PE electric distribution box is designed to provide safe and efficient power distribution for construction, industrial, and temporary site applications. Manufactured from high-quality polyethylene, this durable PE electrical box offers excellent strength, weather resistance, and long-term. Wieland is your experienced and reliable partner for efficient, pluggable and decentralized electrical installation. The increasing number of functions in vehicles require a more reliable, multi-purpose and flexible power network and we offer standard and. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. All the plugs, sockets, MCB, RCBO, RCD can be customized as per buyer's request. The built-in circuit breaker group ensures working performance and reliability, and is easy to use and safe.
