

Removing broadband fiber optic cables

Overview

After fibre installation, the old copper line becomes redundant but may still be physically connected. Avoid DIY removal to prevent damage to. Fiber optic cables provide blazing-fast internet speeds through pulses of light transmitted over glass fiber. However, situations may arise requiring you to disconnect these specialized cables from modems or routers. With delicate glass components and invisible laser operation, caution is necessary. Had full fibre installed yesterday and the engineer did not remove the line to the the telegraph pole or take away the old internal openreach broadband box. Removing these cables from specialized equipment, such as an Optical Network Terminal (ONT) or fiber gateway, requires different precautions than. Are you looking to remove the old line completely?

JA: Is the old line still connected or in use in any way?

JA: Is there anything else the Network Technician needs to know about this situation?

Rest assured, they will be able to help you with removing the old line if necessary. This is a popular video tutorial that is often requested by viewers.
