

Romanian DAC High-Speed Cable 800G

Overview

800G OSFP DAC (Passive Direct Attach Copper) enables high-bandwidth 800G links and supports 800G Ethernet rate. It provides an OSFP copper direct-attach solution. This cable is compliant with OSFP MSA (Multi-Source Agreement), IEEE 802.3ck and 400GBase-CR4 standards. 800G Ethernet DAC cables, as a direct-connection solution based on high-speed copper cabling, are widely used in short-distance connection scenarios within racks and between adjacent racks. With their simple structure, low power consumption, and convenient deployment, DACs provide a cost-effective. FS 800G/1. Purchase from nearby warehouses. The result is a highly flexible DAC cable which reduces the overall bend space up to. The 800G DAC cables deliver cost-effective, ultra-low-latency direct-attach connectivity for high-density data centers and HPC environments. Compatible with common 800G form factors (OSFP and QSFP-DD800), our cables are factory-tested and supplied with EEPROM programming and electrical test reports. As network speeds escalate to 400G and 800G, proper cabling infrastructure becomes critical for maintaining signal integrity and maximizing performance.
