

Roof-mounted cable tray foundation

Overview

Roof blocks for cable tray systems are engineered to provide a secure and stable foundation for supporting electrical cable trays on rooftops. As buildings contain more and more devices and systems requiring structured cabling, the need for sturdy cable tray supports is growing. Insert legs of duct support into bases and attach with 2-1/2" bolt and 1/2" nut. These specialized blocks are designed with durability and ease of installation in mind, featuring a robust construction that withstands environmental. The Unipier Rooftop Pipe Support System from Unistrut offers a full line of supports for conduit, gas and mechanical piping, HVAC ducts, equipment, walkways, and more. Unipier products. The Roof-Pro range of cable management solutions is suitable for supporting the following: For smaller cable volumes, Roof-Pro's TAB-C support utilises a single, broad base that provides effective and non-penetrative support for tray and ladder runs. Installation is simple, with each support. Used for safely and securely mounting cable trays, our RTS Roof Cable Tray Supports (H-Stands) are available in a variety of configurations for numerous applications. They're also designed to maximize job-site efficiency. [Read More Cable Tray Supports from Rooftop Support.](#)
