

# S200 optical module

## Overview

S200-10GPMY-S2-AC supports 8\*10/100/1000Mbps adaptive RJ45 ports and 2\*SFP optical Combo interfaces. Each RJ45 port supports auto-port switching and line-rate forwarding, complying with IEEE 802. Maximum single-port power is 30W. This section describes how to install an optical module. The method used to install a copper transceiver module is the same, except that the copper transceiver module connects to a network cable instead of optical fibers. On an optical network, a sender needs to convert electrical signals into optical signals before sending them to a receiver, and the receiver needs to convert received optical signals into electrical signals. Attached to this entry you. High quality Huawei PAC1000S56-DB (1000 W PoE AC Power Module) For HUAWEI S200 Switch from China, China's leading product market Huawei S200 Sfp Optical Module product, with strict quality control PoE Gigabit Sfp Module factories, producing high quality PoE Gigabit Sfp Module Products. The presence of any such description of a standard or reference to a standard is not a representation that. ZXMP S200 is a compact STM-4/STM-1 multi-service access equipment that implements transmission and management of STM-4, STM-1, E3/T3, E1/T1, FE, N×64k, SHDSL and 2/4-line VF services. Features high level of integration, flexible installation and multiple power supply access methods, ZXMP S200 is.

## Article Content

### What Is an Optical Module

On an optical network, a sender needs to convert electrical signals into optical signals before sending them to a receiver, and the receiver needs to convert received optical signals into electrical signals.

## Replacing an Optical Module

If an optical module cannot be completely inserted into an optical port, turn the optical module over and try again. Cover unconnected optical modules with dust plugs.
