

Seeking to purchase perforated cable trays

Overview

This guide helps you choose from the best Perforated Cable Trays Suppliers globally. They are designed to let air flow around cables and water drain away. The following process steps are involved: degreasing, rinsing, pickling, re-rinsing, fluxing, drying and hot-dipping. The coating thickness depends on the steel composition, the material thickness and the time. We offer a wide range of perforated cable trays which are fabricated using quality raw materials such as Mild Steel, Pre-Galvanised Steel. Perforated cable trays are vital for keeping your electrical wires secure while allowing them to breathe. For smaller diameter cables we provide the 15mm light duty, with the ever popular 30mm high medium duty suitable for most applications. For the larger diameter, FRP/GRP cable trays made by FTC is fabricated out of different pultruded sections of advanced polyester & vinyl ester resins, manufactured by automatic pultrusion machine. We'll assist you in selecting.
