

Switch fiber optic interface fib

Overview

The FIB-1000 Fiber Interface Bridge allows the RS-485 P-Link bus to be converted into or from the fiber optic cable. It is fully supervised and is capable of both Class B and Class A operation. It provides an expert-curated supplier directory, buyer-focused technical background information, and structured selection criteria to support professional procurement decisions. What is a Fiber-optic Switch?

QuickSwitch® Remotely Controllable Fiber Optic Switches to support such applications as Commercial Networks, Industrial Networks, and MiL Spec Operations. SCROLL DOWN to make your product selection or Call 401-943-1164 to let our technical staff assist. The FIB-1000 may be mounted in either the control panel cabinet, the intelligent power supply/P-Link. SC interface: SC interface is widely used in industrial switches, with a rectangular appearance and a plug-in pin and latch fastening method, making it easy to operate. Lfiber's optical switches (singlemode/multimode fiber switches) are micro-optic-based, opto-mechanical switches.
