

Taxes on network server racks

Overview

Server equipment and racks qualify as 5-year property under IRS guidelines. This includes the physical rack infrastructure, cable management systems, and dedicated power distribution units. The rapid rise in cloud computing, AI and data-driven technologies has launched a new era of digital infrastructure — with data centers at its core. As data centers. Many states impose tangible personal property taxes on data centers' machinery and equipment, accounting for more than 20 percent of the total federal, state, and local tax burden on data centers across 12 jurisdictions examined in this publication. Tax abatements for data centers can reduce initial tax burdens by up to 100% in some jurisdictions. Under the Big Beautiful Bill Act, these assets receive immediate expensing. Network equipment belongs on your balance sheet as a long-term asset, with its cost spread across future periods through depreciation rather than. In the matter of place of taxation the Court of Justice of the European Union (CJEU) issued on the 2 nd of July 2020 a judgement on the place of services connected to server racks (C-215/19).
