

The electricity meter is far from the distribution box

Overview

The distance between the meter box and the electric panel box can vary based on local codes and regulations, but a common requirement is typically within 10 to 25 feet. However, a main service disconnect is typically required to be within 6 feet of the meter, depending on local ordinances. Can I verify the code for this area?

Placing your electrical meter box in the right spot might seem like a small detail, but it plays a big role in your home's overall safety and efficiency. Additionally, the meter is held within a proper approved box and we have had no trouble with it since. It keeps it out of the way and accessible. Looks good and certainly got your money's worth on the connection ?
