Overview

Old engraved maps of Paris show that the newly built bridge just grazed the downstream tip of the Île de la Cité; since then, the natural sandbar building of a mid-river island, aided by stone-faced embankments called quais, has extended the island. Crosses River Locale Paris, France Design Material Overview The Pont Neuf is the oldest standing in. It stands by the western (downstream) point of the, the island in the middle of the river that between 250 and 225 BC was the birth. As early as 1550, considered building a new bridge at the Ile de la Cite because the existing was congested and needed repair. The idea was not advanced for lack of funds. By 1577, Henr. The mascarons are 381 stone masks, each different from the others, which decorate the sides of the bridge. They represent the heads of forest and field divinities from ancient mythology, as well as and. At the point where the bridge crosses the, there stands a bronze, originally commissioned from under the orders of, Henri's widow and Regen.
