

Two lights on the fiber optic router turn red

Overview

For LOS (Loss of Signal) red lights on fiber or advanced gateways, it usually means the incoming optical line is not detected or has low signal. Double-check that the fiber line is connected properly and that there's no bend or physical damage. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. A red light on your router can be a source of frustration and confusion. In this comprehensive guide, we will walk you. A blinking red or orange light typically signals an issue with your internet connection or router configuration. A red light or light (or if the light. The tables in this article provide detailed information about the possible appearances of the LED lights on each device, the possible causes of each state, and what you should do.
