

Zero Point Industrial-Grade Switches

Overview

The new ZERO-RS5 and ZERO-RS8 switches enable reliable, space-saving, and efficient networking in industrial and IIoT environments. They combine uncompromising quality with minimal size and meet the highest requirements for temperature, protection class, and system integration – including PROFINET. Advantech's industrial Ethernet solutions provide an abundance of product options including managed and unmanaged switches, Gigabit Ethernet switches, PoE switches (IEEE 802.3af). This gives you the flexibility to build powerful and secure networks, even in harsh environments: copper and FO ports, as well as redundancy. Extreme Industrial Switches are a family of ruggedized Layer 2 switches designed to operate under harsh environments and extended temperature conditions. They provide continuous uptime, manageability, and operational efficiency. With flexible PoE options of IEEE 802.3af. With high-speed 10-GE uplinks, high-wattage PoE options, ultra-low jitter, advanced network security features, and device-to-cloud performance monitoring with the Cisco ThousandEyes agent, these modular switches are your foundation for industrial AI.
